Agate	<p>Agate is a microcrystalline variety of quartz (silica), chiefly chalcedony, characterised by its fineness of grain and brightness of color. Although agates may be found in various kinds of rock, they are classically associated with volcanic rocks but can be common in certain metamorphic rocks. The agate is one of the oldest stones in recorded history.</p>	<p>Blue lace agate is associated with peace, understanding and/or patience. Agates attract strength. Agate is a protection from bad dreams. It also protects from stress and energy drains. Agates have been used in jewelry since Biblical Babylonian times. They were used to ward off storms. They were prized gems in antiquity. The agates with banded colors were placed at the head of a sleeper to give rich and varied dreams. Agates have been thought to be good to harden the gums. Carry an agate when you have to make an important decision.</p>	
Amazonite	<p>Amazonite (sometimes called "Amazon stone") is a green variety of microcline feldspar. The name is taken from that of the Amazon River, from which certain green stones were formerly obtained, but it is doubtful whether green feldspar occurs in the Amazon area.</p> <p>Amazonite is a mineral of limited occurrence. Formerly it was obtained almost exclusively from the area of Miass in the Ilmen mountains, 50 miles southwest of Chelyabinsk, Russia, where it occurs in granitic rocks. More recently, high-quality crystals have been obtained from Pike's Peak, Colorado, where it is found associated with smoky quartz, orthoclase, and albite in a coarse granite or pegmatite. Crystal Park, El Paso County, Colorado is a well-known locality for crystals of amazonite. Some other localities in the United States yield amazonite, and it is also found in pegmatite in Madagascar and in Brazil.</p>	<p>Amazonite balances feminine and masculine energy. It promotes kindness and practicality. It is an excellent stone for artists and for men.</p> <p>Pale azure blue amazonite is know as the lucky "Hope Stone". It will be lucky for all your hopes and dreams.</p> <p>Amazonite helps balance the emotions and gives physical stamina. It makes your skin better and releases fear and anxiety.</p>	
Amethyst	<p>Amethyst is a violet variety of quartz often used in jewelry. The name comes from the Ancient Greek ἀ- ("not") and μέθυστος methustos ("intoxicated"), a reference to the belief that the stone protected its owner from drunkenness; the ancient Greeks and Romans wore amethyst and made drinking vessels of it in the belief that it would prevent intoxication.</p>	<p>Crystalline quartz in shades of purple, lilac or mauve is called amethyst, a stone traditionally worn to guard against drunkenness and to instill a sober mind. It is used as a dream stone and to help insomnia. Ancient Egyptians used the amethyst guard against guilty and fearful feelings. It has been worn as protection from self-deception, as well as a protection against witchcraft. The amethyst has long been used to open the spiritual and psychic centers, making it one of the power stones. It is also used as a meditation aid when worn as a necklace. Amethyst is a gemstone often worn by healers, as it has the power to focus energy. Amethyst is used for problems in the blood and in breathing problems. Amethyst crystal clusters are used to keep the air and life force in the home clean and positive.</p>

Aventurine	<p>Aventurine is a form of quartz, characterised by its translucency and the presence of platy mineral inclusions that give a shimmering or glistening effect termed aventurescence. The most common colour of aventurine is green, but it may also be orange, brown, yellow, blue, or gray. Chrome-bearing fuchsite (a variety of muscovite mica) is the classic inclusion, and gives a silvery green or blue sheen. Oranges and browns are attributed to hematite or goethite.</p>	<p>You should never buy a lottery ticket without an aventurine in your left pocket. Lady Luck will be in your left pocket. This is the stone of opportunity. It is used to aid nearsightedness. Aventurine has a stabilizing effect on the emotions. It is excellent for teenagers.</p>	
Black Spinel	<p>Spinel is relatively unheard of to the common consumer and has not been marketed by any major gem companies. Black Spinel is only found in a few locations in the world, and because of its rarity, if the demand were to rise, supply would not be abundant enough to keep up with it. Black Spinel is mined mainly in Thailand (Boi Ploi, Kanchanaburi), where it is known as "Nin". There are also known deposits in Africa, Myanmar (Burma), and Sri Lanka.</p>	<p>Spinel is associated with love and help the wearer to put their ego aside and become devoted to another person. Spinel also encourages passion and is said to increase the duration of one's life. Black Spinel in particular is said to be a protective stone and helps re-establish relationships and resolve issues. It is also believed to relieve sadness.</p>	
Carnelian	<p>Carnelian (also spelled cornelian) is a clear-to-translucent reddish-brown variety of chalcedony. Its hue may vary from a pale orange, to an intense almost-black coloration. Similar to carnelian is sard, which is brown rather than red.</p>	<p>Restores vitality and motivation - stimulates creativity. Protects from bad vibrations. Guards against poverty. Grounds and anchors you in the present reality. Calms the temper. Balances the sacral hara chakra.</p>

Chalcedony	<p>Chalcedony is a cryptocrystalline form of silica, composed of very fine intergrowths of the minerals quartz and moganite. These are both silica minerals, but they differ in that quartz has a trigonal crystal structure, whilst moganite is monoclinic. Chalcedony has a waxy luster, and may be semitransparent or translucent. It can assume a wide range of colors, but those most commonly seen are white to gray, grayish-blue or a shade of brown ranging from pale to nearly black.</p>	<p>Considered a sacred stone by the Native American Indians, chalcedony nurtures and promotes brotherhood and good will. Used to assist telepathy. Absorbs negative energy and dissipates it. Harmonizes mind, body, and spirit. Instills generosity. Mothers use it to increase lactation, and it also fosters the maternal instinct. It increases physical energy. Healers use it to decrease ill effects of senility and dementia as well as to heal the eyes, gallbladder, bones, spleen, blood and circulatory system.</p>	
Citrine	<p>Citrine is a variety of quartz whose color ranges from a pale yellow to brown. Natural citrines are rare; most commercial citrines are heat-treated amethysts or smoky quartzes. It is nearly impossible to tell cut citrine from yellow topaz visibly, but they differ in hardness. Citrine has ferric impurities, and is rarely found naturally. Brazil is the leading producer of citrine, with much of its production coming from the state of Rio Grande do Sul. The name is derived from Latin citrina which means "yellow" and is also the origin of the word "citron." Sometimes citrine and amethyst can be found together in the same crystal and is referred to as ametrine.</p>	<p>Lucky "Merchant's Stone". Encourages self-confidence. Helps overcome depression. Fortifies the nerves, digestion. Brings Good Luck. Balances the solar plexus chakra.</p>	
CZ	<p>Cubic zirconia (or CZ) is a hard, synthesized material that is optically flawless and usually colorless, but may be made in a variety of different colors. Because of its low cost, durability, and close visual likeness to diamond, synthetic cubic zirconia has remained the most gemologically and economically important competitor for diamonds since 1976. It is sometimes marketed under the brand name "Diamonique".</p>	<p>Cubic Zirconia's hard, brilliant, adamantine luster and strongly refracted transparency is second only to the diamond. It endows prestige and nobility to its wearers and promotes respect and popularity. Cubic Zirconia is particularly good for those born in April (Aries). It bestows good health, financial prosperity, position, prestige and honor. It works quietly to the owner's advantage and protects from jealousy and rivalry. It is good for promoting sleep, happiness, strength and energy.</p>

Emerald	<p>Emerald is a variety of the mineral beryl colored green by trace amounts of chromium and sometimes vanadium. Most emeralds are highly included, so their toughness (resistance to breakage) is classified as generally poor.</p>	<p>The emerald is the sacred stone of the goddess Venus. It was thought to preserve love. The emerald has long been the symbol of hope. It is considered by many to be the stone of prophecy. For some the emerald acts as a tranquilizer for a troubled mind. The emerald is said to bring the wearer reason and wisdom. The strongest time for the powers of the emerald is said to be spring. Lucky for love, give your lover an emerald to stay faithful.</p> <p>In several cultures the emerald was the symbol for fertilizing rain. In the Christian faith it is the symbol of faith and hope. Emerald is used by healers to help heal the heart. The power of the Emerald is highest at the full moon. Some cultures thought the emerald would heal any disease of the eye. The emerald would be placed in a container of water overnight and the water would be poured on the eyes the next day. Emerald is a stone of great harmony, wisdom and love. Giving your lover an Emerald will bring the lover closer if the giver's motives are pure love. The Emerald can be a bridge between 2 people. The Emerald vibrates with love.</p>	
Garnet	<p>The garnet group includes a group of minerals that have been used since the Bronze Age as gemstones and abrasives. The name "garnet" may come from either the Middle English word gernet meaning 'dark red', or the Latin granatus ("grain"), possibly a reference to the Punica granatum ("pomegranate"), a plant with red seeds similar in shape, size, and color to some garnet crystals.</p>	<p>The Garnet is known as the stone for a successful business. If your business is not as good as it should be, just put 3 or more garnets on your desk. It is believed that if a garnet is put under a pillow it will cure depression. Garnets can be used to make a person popular and have self-esteem when worn as jewelry. It helps protect one on trips. Garnets bring constancy to friendships. Garnets are also known for stimulating success in business.</p> <p>Garnet comes in many colors, but now we will speak only about red Garnet. The Garnet is associated with the thyroid and spleen. It helps cleanse and purify both when held over the area. The Garnet is usually held in the hand or placed on top of the head when searching or meditating on past lives. Information that is beneficial and helpful will usually be released for the searcher. The Garnet is a stone of purity and truth as well as a symbol of love and compassion. Green Onyx	<p>Onyx is a cryptocrystalline form of quartz. The colors of its bands range from white to almost every color (save some shades, such as purple or blue). Commonly, specimens of onyx available contain bands of colors of white, tan, and brown.</p>	<p>Onyx was once thought to be the manifestation of a demon imprisoned. It is a protective stone that can be worn to face adversarial situations or people. Onyx jewelry is worn to defend against negativity that is directed at you. Fortifies self confidence and responsibility. Sharpens your senses. Encourages a healthy egotism.</p>	
Jasper	<p>Jasper, a form of chalcedony, is an opaque, impure variety of silica, usually red, yellow, brown or green in color. Blue is rare. This mineral breaks with a smooth surface, and is used for ornamentation or as a gemstone. It can be highly polished and is used for vases, seals, and at one time for snuff boxes. When the colors are in stripes or bands, it is called striped or banded jasper. Jaspilite is a banded iron formation rock that often has distinctive bands of jasper. Jasper is basically chert which owes its red color to iron(III) inclusions.</p>	<p>Jasper comes in many colors. All colors of Jasper will help balance the vibrations of the body. Jasper is slow to show a change to the person, but is such a basic "good" stone that one should always have it on hand. Red Jasper helps with the sense of smell. It also promotes physical energy. Yellow Jasper releases toxins and helps with digestion in the stomach.</p>	
Kyanite	<p>Kyanite, whose name derives from the Greek word kyanos sometimes referred to as "kyanos", meaning deep blue, is a typically blue silicate mineral, commonly found in aluminium-rich metamorphic pegmatites and/or sedimentary rock. Kyanite in metamorphic rocks generally indicates pressures higher than 4 kilobars. Kyanite is used primarily in refractory and ceramic products, including porcelain plumbing fixtures and dishware. It is also used in electronics, electrical insulators and abrasives. Kyanite has been used as a gemstone, though this use is limited by its anisotropism and perfect cleavage. Kyanite is one of the index minerals that are used to estimate the temperature, depth, and pressure at which a rock undergoes metamorphism. Finally, as with most minerals, kyanite is a collector's mineral.</p>	<p>Blue kyanite helps open psychic ability, enhances telepathic communication, assists in lucid dreaming. The fan like clusters or blades that are formed by kyanite make it an ideal stone for restoring energy balance. It is a very effective energy conduit that can balance most systems of the body. It can quickly create stillness and tranquility, making it an excellent stone for meditation.</p>

Mookaite	<p>Mookaite is the common, or popular, name for the rock with the geological name Windalia Radiolarite, being a fine grained, silicified and multi-coloured, radiolarian siltstone, found in outcrops, principally on Mooka Station (a sheep farm of around 700,000 acres) on the west side of Kennedy Range in Western Australia. It is an Australian Jasper that combines the lighter colors of yellow and red jasper.</p>	<p>Mookaite encourages the desire for new experiences and helps to keep a balance between external activities and the internal response to these. It imparts a deep calm while encouraging versatility. In Australia, mookaite was and still is considered to be a healing stone that bestows strength. It is said to shield the wearer from difficult situations and to connect us to loved ones who have passed away. Mookaite is believed to bring us into the "here and now," aiding with problem assessment and decision making. Mookaite is often used to treat glandular or stomach disorders, hernias, ruptures and water retention, and yoga enthusiasts use it for the first, second and third chakras.</p>	
Pearls	<p>Freshwater pearls are a kind of pearl that comes from freshwater mussels. They are produced in Japan and the United States on a limited scale, but are now almost exclusive to China.</p>	<p>The pearl is the oldest known gem, and for many centuries it was considered the most valuable. Unlike all gems, the pearl is organic matter derived from a living creature - oysters and mollusks. There is much folklore and tradition about the pearl. In fact so much history accompanies this stone that five months claim it as a birthstone - February, April, June (traditional), July and November. The pearl is an astral stone for the signs Gemini and Cancer, and astrologers link it to the moon. It was said in some early cultures that the pearl was born when a single drop of rain fell from the heavens and became the heart of the oyster. Pearls have been called the 'teardrops of the moon'. Some believe that pearls were formed by the passage of angels through the clouds of heaven. Over time, the pearl has become the symbol of purity and innocence and it is often sewn into bridal gowns, or worn as jewelry by the bride.</p>	
Peridot	<p>Peridot is gem-quality forsteritic olivine. The mineral olivine is a magnesium iron silicate. It is one of the most common minerals on Earth, and has also been identified in meteorites, the Moon, Mars, in the dust of comet Wild 2, within the core of comet Tempel 1, as well as on asteroid.</p>	<p>A tiny island known as Zabargard (owned by Egypt) is documented as the first source of peridot, dating back as far as four thousand years. Early Crusaders who visited St. John's Island (now called Zabargard) introduced this gem to Europe upon return from battle. Peridot is mentioned in many ancient references as chrysolite. It is mentioned throughout the Bible, and early Christians considered it sacred. Today still, Catholic Bishops traditionally wear a ring of peridot and amethyst as a symbol of purity and morality. The peridot was believed to be a stone of springtime by ancients who considered it a gift from Mother Nature. Napoleon once made a gift of peridot to Josephine as a symbol of undying love and admiration. In ancient times, it was said that a dream about peridot foretold impending danger. Healing qualities of peridot - Peridot is a stone of lightness and beauty. Only spiritual or clear-minded persons should use peridot. The person with too many earthly problems will not be able to understand the beauty of the Peridot. The very spiritual can wear peridot in a necklace with the stone at the base of the throat to feel its soothing effect. Used in a necklace, peridot is a protector against negative emotions. Peridot has been known to have healing effect on the gall bladder and liver.</p>

Rhodochrosite	Rhodochrosite is a manganese carbonate mineral. In its (rare) pure form, it is typically a rose-red color, but impure specimens can be shades of pink to pale brown. The streak is white. It is transparent to translucent, and is often confused with the manganese silicate, rhodonite, but is distinctly softer.	Pink is the color expression of love and most pink gemstones have energies that relate to love. Rhodochrosite directs this energy first toward the self for the purposes of emotional healing. It works to repair old wounds and areas where disharmony exists. Rhodochrosite is a stone of joy. Rhodochrosite energies align with the child within you, promoting a sense of playfulness. It is also an effective stone for recovering hidden or forgotten talents. Opens the heart chakra. Stimulates circulation and blood pressure, kidneys and reproductive organs. Soothes the heart, stimulates warm feelings of love and compassion, benefits the creative process and promotes intuition.	
Rhodonite	Rhodonite is a manganese inosilicate and member of the pyroxenoid group of minerals, crystallizing in the triclinic system. It commonly occurs as cleavable to compact masses with a rose-red color, often tending to brown because of surface oxidation.	Rhodonite soothes the nervous system. This gemstone vibrates with love. Just holding this gemstone promotes relaxation and brings a sense of well-being. This is a balance gemstone and is used to clear the psychic centers. Rhodonite raises self worth and helps ward off negativity. Rhodonite is sometimes called the "rescue stone" because it heals emotional shock and panic and aids in recovery from emotional self destruction. This stone nurtures love and brotherhood. It can help in reconciliation, forgiveness, recovery from abandonment or betrayal. Opens the heart chakra.	
Ruby	The ruby is a pink to blood-red colored gemstone, a variety of the mineral corundum (aluminium oxide). The red color is caused mainly by the presence of the element chromium. Other varieties of gem-quality corundum are called sapphires. The ruby is considered one of the four precious stones, together with the sapphire, the emerald, and the diamond.	The ruby is considered to be the most powerful gem in the universe, and is associated with many astral signs. To own a ruby is said to have contentment and peace. Placed under a pillow the ruby may ward off bad dreams. Ruby rings should be worn on the left hand so as to receive the life force and have protection. Given as a gift, the ruby is a symbol of friendship and love. The ruby is also the symbol of vitality and royalty. The Ruby is filled with love. It also helps sexual love to be more passionate. Persons lacking in self-love should have and mediate on the Ruby. It also gives the courage to be best potential that a person has. Ruby works with the flow of blood as an aid to circulation. It aids the cleansing and removal of infection or germs in the blood. The Ruby may be worn in jewelry, but never close to the solar plexus, as the Ruby has a disquieting effect upon it. In a ring wear it on your left hand. The color of rubies varies from vermilion to red. The most desired color is "pigeon's blood", which is pure red with a hint of blue. If the color is too pink, the stone is a pink sapphire. The same is true if it is too violet - it is a violet sapphire. The best rubies and star rubies are bright red. Most rubies come from Burma and Thailand.
